Experience

UI/UX Designer Intern Jan. 2026 – May. 2026
KMC Solutions (Internship)

- Design responsive **web** and **mobile interfaces**, improving layout, usability, and overall user experience.
- Support end-to-end design processes, from **concept creation** and **user flow implementation** to final prototypes.

Data Entry & Design Assistant Sep. 2025 – Mar. 2026
Improbable Labs (Part-Time, Remote)

- Conducted **keyword research** and managed **data entry** workflows for brainstorming of app development.
- Designed **graphic designs** as app store previews to enhance visual appeal and drive user engagement.

Education

National University Laguna 2022 – 2026
Bachelor of Science in Information Technology, Dean's Lister

Awards

1st Runner Up, Protothon 2026: The Online UX Hackathon May 2026
◦ Designed **Trackify**, an enterprise inventory system featuring real-time tracking, barcode integration, and analytics. The design placed **2nd out of 35 teams** in the Enterprise track.

Projects

Lakbay Calamba: Digital Information & Tourism Monitoring System July – Oct. 2025
◦ Developed an interactive digital map of tourist hotspots using **Google Maps API** for Calamba City.
◦ Contributed to the system's interface and user experience design by creating **wireframes**, **page layouts**, and **prototypes** for the admin, establishment, and tourist dashboards.

Payonnect: Smart Umbrella Sharing System Oct. 2025
◦ Simulated the **user flow** for borrowing and returning an umbrella using QR codes.
◦ Implemented the **UI screens** with consistent **typography** and **color palette** to enhance user experience.

CosMarket: Buy, Sell, and Rent Cosplays Mar. 2025
◦ Contributed to a **UX case study** by analyzing cosplay market communities and noting **user pain points**.
◦ Created **consistent page designs** and mapped the **interactive user flow** from item browsing to checkout.

Student Discipline Tracking and Offense Logging System Using RFID Nov. 2024 - Mar. 2025
◦ Developed a system for logging and monitoring student discipline records using **RFID technology** of IDs.
◦ Converted designs into **PHP frontend components** for the profile, registration, and dashboard modules.

SpendSmart: A Budget and Expenses Management System June 2024
◦ Developed a **web-based budget management app** with automated expense reports.
◦ Implemented frontend modules for **budget creation** and **expense tracking**.
